What is HXL?

HXL is a different kind of data standard, designed to improve information sharing during a humanitarian crisis without adding extra reporting burdens.

Adding HXL tags

| Organisation | Cluster | District |
|--------------|-----------|-----------|
| #org | #sector | #adm1 |
| Org A | WASH | Coast |
| Org B | Health | Mountains |
| Org C | Education | Coast |

Add HXL tags between the last row of headers and the first row of data.

Use attributes like +code to refine tags.

If you need to create new tags, start them with #x_ (e.g. #x_virulence).
